

# IBC Frames

## Product Options Information Sheet

### Galvanised steel

Standard specification on Francis Ward general purpose IBCs. The galvanisation provides excellent long term protection against rust and corrosion.

### Stainless steel

Rust proof frames with a high quality finish for applications where hygiene and cleanliness are important and where frame cleaning is carried out on a regular basis.

### Powder coated steel

Powder coating provides the option of colour coding the frames for product or corporate identification.

Powder coatings are prone to chipping with time and can be hard to maintain. Recommended in applications where long term heavy handling is not envisaged.

Whilst every attempt has been made to ensure that the information provided in this product information sheet is accurate and reliable Francis Ward cannot accept responsibility for the interpretation of the information provided. It is the responsibility of the user to determine the chemical compatibility of the container with its intended contents.
