

IBC Handling

Product Options Information Sheet

Available for general purpose IBCs.

Anti-tilts

Flat steel bars attached to the feet of the IBC and tied to the base frame to prevent tilting of the IBC when lifted by a fork lift truck.

Fork Tunnels

Steel fork tunnels can be fitted above or below the base frame on the IBC for secure fork lift handling.

Castors

Nylon castors with galvanised steel mountings can be attached to the base frame on the IBC to enable movement without the use of fork lifts or pallet trucks.

Castors can be steerable or lockable.

Whilst every attempt has been made to ensure that the information provided in this product information sheet is accurate and reliable Francis Ward cannot accept responsibility for the interpretation of the information provided. It is the responsibility of the user to determine the chemical compatibility of the container with its intended contents.
