

# Warboy

## Anatomy of Francis Ward's double walled drum

### General description

The Warboy has been designed for the storage and transportation of hazardous fluids.

The drum consists of an outer enclosure with a seam free inner receptacle retained within the outer enclosure by a non-removable base.

All of the components are rotationally moulded from high impact strength high density polyethylene formulated with UV protection for long term outdoor use.

The Warboy is a UN 6HH1 type container approved for the carriage of Packing Group II fluids up to 1.9 SG; it is not restricted to the UN 5 year life limit imposed on single walled containers.

### Features

Whilst every attempt has been made to ensure that the information provided in this product information sheet is accurate and reliable Francis Ward cannot accept responsibility for the interpretation of the information provided. It is the responsibility of the user to determine the chemical compatibility of the container with its intended contents.
