

Drum Accessories

Information Sheet

Closure torque wrench adaptor

To ensure compliance with UN regulations drum closures should always be screwed down to the UN tested and approved torque setting as defined in the drum specification.

The torque wrench adaptor fits the drum closure and enables the attachment of a 19mm socket for a torque wrench.

Closure spanner

For unscrewing FW closures.

The closure spanner is a custom fit to the FW closure design allowing the removal of closures from drums with minimum damage to the closure.

Cap tap

For controlled safe discharge of drum contents.

The cap tap is produced from LLDPE and has a venting tube to prevent liquid gugging when discharging drum contents.

Red cap taps are fitted with Viton seals. Natural cap taps are fitted with XLPE foam seals.

Whilst every attempt has been made to ensure that the information provided in this product information sheet is accurate and reliable Francis Ward cannot accept responsibility for the interpretation of the information provided. It is the responsibility of the user to determine the chemical compatibility of the container with its intended contents.
