Description

The DGC 90° is a re-usable silo IBC designed for the transportation and storage of dry goods e.g. powders and granules.

The DGC 90° liner is a one piece rotational moulding made from natural coloured UV stabilised linear medium density polyethylene. It has a 90° conical form and is supported and protected by a galvanised mild steel frame. The base of the frame has an integral four way fork truck entry.

The liner inlet which is 350mm in diameter has a GRPP screw cap fitted with an EPDM O-ring seal. The vertical outlet at the base of the liner can be specified with a variety of valves to suit individual applications.
