

Warhorse

Product Information Sheet

Standard Specification

Dimensions

Width/Depth/ (mm)	305 / 325
Height (mm)	See product range
Filling inlet diameter (mm)	50
Tare weight (kg)	See product range
Nominal capacity (L)	See product range

Composition

Drum	LMDPE ²
Closure	LMDPE ²
Closure gasket	XLPE ³ Foam

Options

Colour – Red, Blue, Yellow, Purple, Green

1 – High Density Polyethylene
2 – Linear Medium Density Polyethylene

General Description

The Warhorse is a re-usable drum primarily designed for the storage and transport of equestrian water.

The drum incorporates an integral ergonomically shaped handring, an offset pouring spout and secure interstacking features. The design allows optimal draining with less than 0.1% of nominal capacity retained when the container is emptied.

Warhorse drums are supplied with a cap and with a cap tap to allow controlled water dispensing.

The drum is rotationally moulded in LMDPE. Unlike blow moulding the process is essentially stress free and creates a container with no seams or welds. The body of the moulding is of generally uniform wall thickness with thickening in corners and radii where reinforcement is of most benefit.

The polymer used in the manufacture of the drum is highly UV stabilised and exhibits excellent low temperature impact strength, chemical resistance and ESCR.

Reusable drums for water storage and transport

Model shown is a blue 30L Maxi square with cap tap fitted.

Warhorse Range

TYPE	Mini Square	Maxi Square
Capacity - L	20 L	30 L
Height - mm	365	455
Tare Weight - kg	2.00	2.50
