

PCM Dripguard

Corrosion protection for PCM pallet bases

Chemical spillage from PCM outlet valves can cause unsightly and damaging corrosion of PCM pallet bases. Pallet bases become structurally weakened and the containers handling safety can be compromised.

Costly pallet base replacement or refurbishment can now be avoided.

The PCM Dripguard has been designed to provide PCM users with an effective anti-corrosion guard for PCM pallet bases.

The Dripguard is rotationally moulded in black UV resistant LMDPE. The Dripguard securely clips on to PCM pallet bases, no screws or bolts are required.

Dripguards can be retrofitted to existing PCMs and/or supplied as an optional accessory on new PCMs.
